Nature Walk

Welcome to day one of Outdoor Adventure!

To kick off our week, we are going to start with a nature walk. Your goal for today is to be able to identify biotic and abiotic factors of nature in your area.

Materials:

Scavenger Hunt List

Pen/Pencil

Paper/Journal

Camera (Optional)

Binnoculars (Optional)

- With an adult, find an area of natural space such as a park, trail or small woodland to go on your nature walk.
- During your walk, refer to your scavenger hunt list and try to find and identify as many biotic and abiotic factors of nature that are listed as you can.
- As you identify these factors, take pictures or make note of them in a journal or on a piece of paper.
- When you get home, reflect on the things you identified on your walk and consider how they may interact with each other within the ecosystem.
