

Bean in a Bottle – Student Worksheet

In this activity, you will construct a special kind of planter. The string will draw water up the string from the bottom of the bottle to the plant located in the top of the bottle.

Draw a picture of your Bean in a bottle here:

How does agriculture relate to science and why is it important that these fields work together?

How does the water get to your bean?

How could these kind of planters be useful in a space colony?
